

GREEN ZIPPER

HEIDELBERG

assignment Cooperative competition Patrick Henry Village - construction site B3 + B4, Heidelberg **location** Heidelberg, Germany **size** 8 ha **client** Bundesanstalt für Immobilienaufgaben (BImA) (Vertreten durch: Bundesbau Baden-Württemberg, Staatliches Hochbauamt Heidelberg) **services** Urban development and open space planning draft **status** in progress **team** Oliver Seidel, Jacob Fielers, Lena Laueremann **cooperation** Planergruppe Oberhausen **award** 1. prize **projectnumber** 2108-HPV

We are happy about the selection of our design „GREEN ZIPPER“ for the Patrick Henry Village in Heidelberg (Germany). Together with Planergruppe Oberhausen, we prevailed against five well-known teams with a concept that transforms the former mono-functional military barracks into a multifunctional and identity-creating living environment. How can the existing structure be rebuilt and supplemented so that it can become a revitalized urban space? Our design lets the landscape create the city and uses it as a „green zipper“, creating a generous connecting space for the inhabitants.

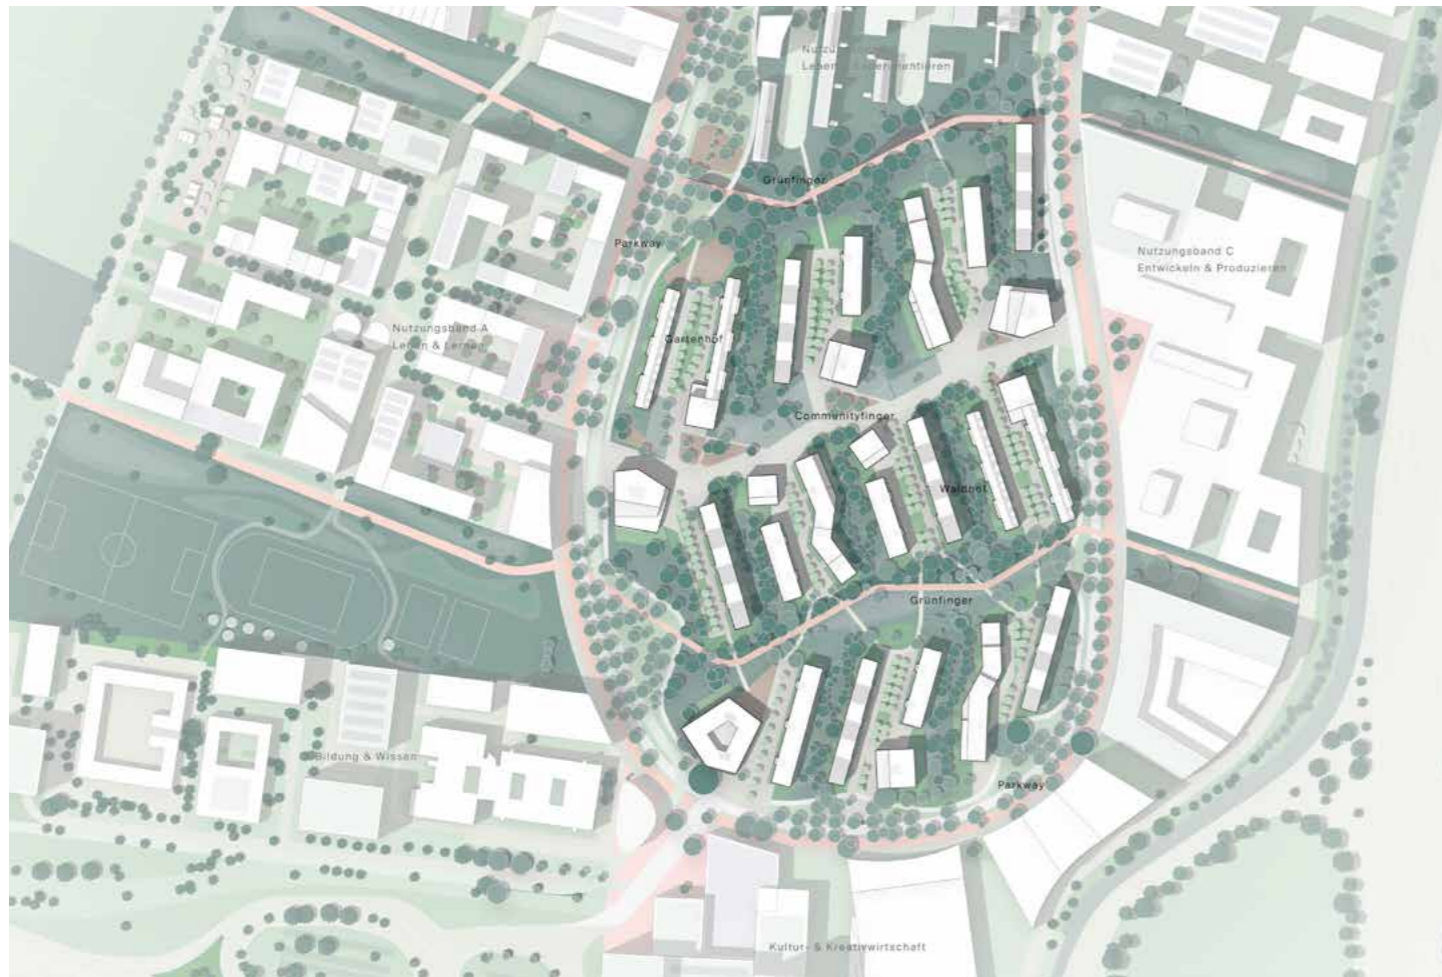

Our design offers the potential to rearrange existing deficits in the monofunctional and structural building and open space structures of the current rows of existing houses from the 1950s, to differentiate them in their design and to program them in many ways. The result is a lively quarter for people and nature with open spaces and buildings made of wood that can be used in a variety of ways.
